

**Justin  
Cooper**

<b>Conclusion:</b>	Based on the DNA typing results obtained, it is at least 520 Trillion times more likely if the observed DNA profile from the swabs from black & blue fabric gloves originated from <u>Justin Cooper</u> and three unrelated, unknown contributors than if the data originated from four unrelated, unknown individuals.
<b>Verbal Scale:</b>	This analysis provides very strong support that <u>Justin Cooper</u> is a contributor to the DNA profile developed from the swabs from black & blue fabric gloves.
